DETAILED ACTION***Drawings***

Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities:

Page 8, line 16, "Vcc2_OUT" should correctly be --VCC2_OUT--.

Page 9, line 3, "L_c1" should correctly be --I_c1--.

Page 10, line 6, "L_c2" should correctly be --I_c2--.

Page 11, line 21, first and second occurrence of "Vcc2_OUT" should correctly be --VCC2_OUT--.

Page 12, line 23, "trnasister" should correctly be --transistor--.

Art Unit: 2817

Page 12, line 25 and page 13, line 2,

There are a number of Equations in the specification. However, it is not clear what the “two dots” located at top and bottom of the equal sign (=) represent (see Equations 1-3, 5-12). Note Equation 4 has no “dot”.

Appropriate correction is required.

Claim Objections

Claim 4 is objected to because of the following informalities: “harmonic” should correctly be --high frequency--, see page 8, lines 17-18.

Claim 6, page 18, line 1, a **comma (,)** is needed after the second occurrence of the word “element”.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, an “inductor (L1)” called “a negative **feedback** inductor” appears to be unclear. It appears to act as a **current source** and not a **feedback** as claimed. If the applicant insists such element (L1) having the connection thereof is well known in the art and called as “a negative feedback inductor”, applicant is encouraged

Art Unit: 2817

to supply such Prior Art or explain how inductor (L1) is feeding back. Also note, the specification page 6, lines 11-13.

Regarding claim 6, it is not clear from the specification which element called "power breaking element", "rectification element", and "voltage distributing elements".

Regarding claim 7, it is not clear from the specification which element called "bias elements", "a plurality of elements for determining decrement in a power", and "amplification elements".

Regarding claim 8, it is not clear which elements constitute the claimed "bias current mirror" for each bias circuit unit.

Allowable Subject Matter

Claims 1, 2, 4, 5 are allowed.

Claims 3, 6-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 1, 2, 4, 5 call for, among others, a first bias circuit unit and a second bias circuit unit having the functions thereof.
